Student Experience & School Climate Indicators

Behavior Patterns

- Tardiness remains the most common behavior challenge, significantly outpacing all other referral types (approx. 750–775 incidents across A1).
- Uniform expectations are the second most frequent referral, consistent with seasonal patterns seen in prior years.
- Other behaviors such as disruption, skipping, and out-of-area remain far less frequent but continue to be monitored.

Major Incidents

- Early high school grades show the highest concentration of major incidents (notably Grade 10).
- Most consequences result in short-term, proportionate actions (majority OSS, followed by ISS/OTC).

Attendance & Engagement

- MS attendance remains strong, currently above 95% ISA with positive short-term trends.
- HS attendance shows slight softening but remains aligned with patterns seen at the same point in prior years.
- Chronic absenteeism sits at 21.3% overall, with MS significantly lower than HS — a continuation of multi-year trends.
- Truancy rates remain low, stable year-over-year at 1% MS and 2% HS.
